

Patient Care Outcomes:

The table below depicts Mercy ACO's most recent quarter of results from Medicare Claims data as compared to the benchmark for our population. As noted, the measures are moving directionally to indicate success in our efforts; our strategies of reaching out and connecting with patients in the primary care setting are effective at reducing utilization of costly inpatient services.

Chronic Disease Care		
Indicator		Percentage above or below benchmark
CHF Admits	↓	14%
COPD Admits	↓	23%
Pneumonia Admits	↓	12%
Utilization		
Indicator		Percentage above or below benchmark
Readmits/1000	↓	6.0%
Admits/1000	↓	17.3%
CT Events /1000	↓	7.7%
MRI Events/1000	↓	0.8%
Primary Care Visits	↑	1.7%

Results: Q1 2015 Medicare-Compared to Benchmark

Cost Savings Outcomes:

The care management measures above drive the cost saving measures noted in the table below. Represented are contracts Mercy ACO has with various payers and the cost reduction results achieved each year.

Mercy ACO Results		\$29,235,094	
		Reduced Healthcare Expense for Iowans	
	2012	▼ 2.9%	\$2,545,114
	2013	▼ 2.3%	\$5,287,321
	2014	▼ 4.4%	\$3,657,750
	2012/13	▼ 3.4%	\$9,033,330
	2014	▼ 1.7%	\$7,560,515
	2013	▼ 10.7%	\$ 330,647
	2014	▼ 7.2%	\$ 303,461
	2013 ^[1]	▼ 1.9%	\$ 708,214
	2014 ^[1]	◀ 0.5%	(\$ 191,258)
