Children: Madden (4), Ava (2)

business accomplishments

“Austin is the Project Manager for JE Dunn’s most complex projects in Des Moines. His responsibilities are extensive in that he manages projects from \$1 million to nearly \$75 million. He has a unique sense of understanding of what is most important to our clients, whether it be budget, schedule, design, programming, or public image. Not only does he manage the client’s needs, he works closely with the architect, trade partners, and other team members who help him manage the project. Austin has a tactful and friendly approach when managing projects, which results in clients returning to JE Dunn for their next endeavor because they have an exceptional experience with him at the helm.”
