To Whom It May Concern:

I am proud to recommend Ryan Peterson of Impact7G for the "40 under 40 recognition."

I have worked with Mr. Peterson since 2006 when he was employed with Howard R. Green Company. He handled over 305 cellular sites; doing Phase I; NEPA and other environmental work for AT&T. The deadlines were fierce, and Ryan met them all without delay!

Ryan took his skills; knowledge and talents, and opened his own company called Impact7G in January 2011. He built this company from the ground up, and took a big chance doing so during a rough economy. During this transition, Ryan's performance for AT&T never faltered. I could always count on him to help train my vendors in environmental issues; questions on tribal issues; rush projects, and any other telecommunication assistance.

Since opening his own company, Ryan has assisted me in over 1200+ telecommunication sites in the Midwest; doing environmental work. He continues to do exceptional work, and I'm proud to recommend him for this award!

Sincerely,

A handwritten signature in cursive script that reads "Mary Jo A. Carlson".
